Medicaid Management Reports

THIRD QUARTER

FISCAL YEAR 1977

Medicaid Bureau

Health Care Financing Administration

U.S. Department of Health, Education, and Welfare

FOREWORD

The Medicaid Bureau has extensively revised the graphs and tables which comprise the Medicaid Management Reports. A narrative summary of quarterly highlights has also been added to the reports. These changes were instituted to improve the readability, utility, and quality of these reports. We hope that you will like the new formats on which data on the Medicaid program are displayed.

The Medicaid Management Reports are published by the Medicaid Bureau's Division of Analysis and Evaluation. These reports are designed to present some current data on State Medicaid programs and to identify program trends through a series of tables and graphs. They are prepared quarterly from data submitted by the States to the Federal government on forms OA-41 and HCFA-120.

The Medicaid Management Reports provide the Medicaid Bureau with national and individual State trends that are used to help identify States and program areas in which program monitoring activities should be centered. They also help the Medicaid Bureau fulfill its responsibility for making data on the Medicaid program available to Congress and others interested in the Medicaid program. In addition, it is hoped that publication of the data in this form will result in an improvement in the quality of the data submitted by the States to the Federal government.

Types of data presented in the Medicaid Management Reports include:

Amount of State Medicaid Expenditures

Amount of the Federal Share of State Medicaid Expenditures

Amount and Distribution of Medical Vendor Payments by Type of Service

Average Monthly Number of Medicaid Recipients for whom Medical Vendor Payments were made

Average Monthly Participation Rate in Medicaid by Public Assistance Recipients

Average Monthly Payment per Medicaid Recipient by Basis of Eligibility

Number of Children Screened and Referred under EPSDT

The data presented should be used with caution for the following reasons. There is much variance between States in the types of medical services covered under Medicaid and in the designation of groups eligible for Medicaid. Data which are generated through State claim payment systems are affected by the time lag between the provision of medical services and payment for those services. Only data from the OA-41 report has been verified by the Federal government. Lastly, incomplete reporting by the States may distort the national totals and averages.

Quarterly Highlights
April - June 1977

Cumulative total Medicaid expenditures in the United States for the first three quarters of Federal fiscal year 1977 (October 1976 - June 1977) were $12.8 billion, an increase of 13.5% from the corresponding quarters in fiscal year 1976. Medical Assistance Payments rose by 13% to nearly $12.2 billion while expenditures for State and local administration and training for Medicaid rose by 25% to $651.2 million between these two periods. Most of this rapid expansion of administration and training expenditures occurred during the first two quarters of FY 77. The unadjusted Federal share of total State and local Medicaid expenditures for the first three quarters of Federal fiscal year 1977 was $7.1 billion, an increase of 13% from the corresponding quarters of fiscal year 1976.

For the quarter ending June 30, 1977, total State and local Medicaid expenditures in the United States increased by 20% to $4.6 billion as compared to the corresponding quarter ending June 30, 1976. Over the same period, the average monthly number of Medicaid recipients in the United States increased by 2.3% to 9.1 million. Medical Assistance Payments rose by 20% to $4.3 billion while expenditures for State and local administration and training for Medicaid rose by 14% to $224 million between these two periods. The unadjusted Federal share of total State and local Medicaid expenditures for the quarter ending June 30, 1977, was $2.5 billion, an increase of 20% from the corresponding quarter in 1976.

Institutional services accounted for the largest proportion of Medical Vendor Payments made during the quarter ending June 30, 1977. Inpatient hospital services accounted for 32% of all payments made while ICF and SNF services accounted for 22% and 17% of all payments made respectively. ICF services for the mentally retarded was the service which experienced the largest percent increase in payments in the United States between the quarters ending June 30, 1976 and June 30, 1977, these payments increasing by 47% to nearly $273 million.

AFDC related children comprised the single largest group of Medicaid recipients in the United States in the quarter ending June 30, 1977, representing 31% of all Medicaid recipients reported.

During the quarter ending June 30, 1977, 37% of all public assistance recipients in the United States used Medicaid services. Aged individuals who were also SSI beneficiaries had the highest rate of Medicaid use of all eligible groups on public assistance - 57%.

The average monthly payment for all Medicaid recipients in the United States during the quarter ending March 31, 1977, was $155, an increase of 16% from the corresponding quarter in 1977. Aged and disabled recipients with average monthly Medicaid payments of $253 and $280 respectively, were the eligible groups with the highest average monthly payments in the United States during this period.

During the quarter ending June 30, 1977, a total of 509,650 children were screened in the United States under the EPSDT program. This represented a 2.4% increase in the number of children screened from the corresponding quarter in 1976. Nearly 52% of all children screened in the United States were found to have referrable medical conditions.

The unadjusted Federal share does not reflect financial adjustments that are made to the Federal share after the State expenditures are reported to HEW.

II. ELIGIBILITY CRITERIA

Medicaid is designed to provide medical assistance to those groups or categories of people who are eligible to receive cash payments under one of the existing welfare programs established under the Social Security Act; that is Title IV, the program of Aid to Families with Dependent Children (AFDC) or Title XVI, the Supplemental Security Income (SSI) program for the aged, blind and disabled. Medicaid eligibility is available to people who fit into one of the categories of people covered by the cash welfare programs as aged, blind or disabled individuals, or as members of families with dependent children when one parent is absent, incapacitated or unemployed. Medicaid eligibles are classified as categorically needy or medically needy within the above categories. The categorically needy are those individuals who are receiving cash assistance or would be receiving such assistance if they applied under one of the cash welfare programs described above. The medically needy are individuals who would be eligible for welfare except that their income are too high. In addition, some States have exercised the option of including other needy persons in their Medicaid programs who do not fall into one of the above categories. Such individuals are classified as "other" Title XIX recipients.

MENTAL HOSPITAL - A hospital primarily engaged in providing psychiatric services for the diagnosis and treatment of mentally ill persons.

INTERMEDIATE CARE FACILITY SERVICES - All services provided, and billed for, by an institution furnishing health-related care and services to individuals who do not require the degree of care provided by hospitals or skilled nursing facilities as defined under title XIX, but who because of their physical or mental condition require care and services above room and board. Intermediate Care Facility (ICF) services may also include ICF services for the mentally retarded receiving active treatment in certified institutions for the mentally retarded or persons with related conditions.

SKILLED NURSING FACILITY SERVICES - Skilled nursing or rehabilitative services provided under physicians' orders on an inpatient basis and billed for by a certified facility that meets standards for skilled care established under the title XIX program.

Exclude all such services that are provided as a part of inpatient or outpatient hospital services, or of clinic or laboratory services, and billed for by the hospital, clinic or laboratory.
